MEMORANDUM FOR: Executive Director, NPIC

SUBJECT : CODIB Meeting, 18 June 1964

The following items of interest to NPIC were discussed at the CODIB Meeting of 18 June 1964:

1. [ ] reported that the Remote Systems Input Committee, working through Navy Logistics, had contracted with General Dynamics/Mitre Corp. for five prototype tape producing typewriters. These typewriters will produce either 5 or 8 channel tape without audio, electromagnetic or electronic radiation and are supposed to be delivered in 18 months. After testing and acceptance, production models will become available in another 18 months, making a total of three years minimum. before replacements for the insecure Frieden Flexiwriters will be available.

50X1

2. Mr. Borel requested all members to be sure that the regulations for releasing intelligence information to contractors were widely disseminated and understood within their components. [ ] mentioned that they have for a ninety-day test a new Xerox LDX Facsimile Transmission system installed and operating between the first and second floors at Langley. It is currently being used only for unclassified transmission, but it may be used for Secret transmission in-house pending the results of security checks. The system transmits over eight pages per minute at 130 lines per inch. While the transmission signals cannot be handled by current cryptographic equipment, Xerox has proposed splitting the output so that two parallel [ ] systems would be able to handle it.

50X1

[ ] in conversations following the meeting, expressed his strong belief that NPIC should take steps to procure [ ] (which he understands to be in very short supply) so as to be able to install a Facsimile link between Building 213 and Langley. I informed [ ] that we were acquiring two [ ] for use on the data transmission links and that I felt certain these could also be used for Facsimile transmission by installing a simple plugboard switching arrangement to permit ties to either the Univac 1004 or the Facsimile gear.

SUBJECT: CODIB Meeting, 18 June 1964

3. A major part of the meeting centered around the dissolution of SCIPS, the establishment of a CODIB Secretariat, and selection of CODIB task teams and their chairmen. The Secretariat is to be called the CODIB Support Staff with [ ] appointed Acting Chief. Initially the Staff has to have two CIA, two DIA and two clerical members.

50X1

It was decided that the chairmen of the various task teams would be asked to draft terms of reference for CODIB approval, and following their approval CODIB members would designate those teams on which they wish to have membership. Mr. Borel stated that he expected team members and chairmen would have to devote perhaps more than one quarter of their time to CODIB work, but he did not expect them to become involved as much as half time.

Teams of particular interest to NPIC are:

Installations. Chairman is to be either [ ] from DIA, and the team is apparently to concern itself primarily with naming problems. This is the one Mr. Borel has asked for Brugioni to represent NPIC.

50X1

Photo Chip. [ ] of DIA was designated Chairman over the objections of the Air Force, who wanted to appoint [ ] headed the DOD committee which developed their present standard. This is the committee for which I was nominated to represent NPIC.

50X1

50X1

Two other committees may be of some interest to NPIC. The team on Research and Development, to be chaired by Dr. Ruth Davis (DOD), will consider R&D aspects in the information processing field. The team on Content Control, chaired by [ ] NSA, may also be of some interest in terms of ADP text scan techniques.
